

### Exercise 1F

Q7

**Answer :**

Option c is correct.

The largest eight-digit number = 99999999

The smallest eight-digit number = 10000000

Total number of eight-digit numbers =  $(99999999 - 10000000) + 1$   
 $= 89999999 + 1$   
 $= 90000000$

Q8

**Answer :**

Option b is correct.

The number just before 1000000 is 999999 (i.e.,  $1000000 - 1$ ).

Q9

**Answer :**

Option a is correct.

V, L and D are never subtracted. Thus, VX is wrong.

Q10

**Answer :**

Option c is correct.

I can be subtracted from V and X only. Thus, IC is wrong.
