

Mensuration I Ex 20.1 Q10

Answer :

We have,

Length of the table top = 9 dm 5 cm = $(9 \times 10 + 5)$ cm = 95 cm [Since 1 dm = 10 cm]

Breadth of the table top = 6 dm 5 cm = $(6 \times 10 + 5)$ cm = 65 cm

\therefore Area of the table top = Length x Breadth = $(95 \text{ cm} \times 65 \text{ cm}) = 6175 \text{ cm}^2$

Rate of polishing per square centimetre = 20 paise = Rs. 0.20

Total cost = Rs. (6175×0.20) = Rs. 1235

Mensuration I Ex 20.1 Q11

Answer :

We have,

Length of the floor of the room = 9.68 m

Breadth of the floor of the room = 6.2 m

Area of the floor = $9.68 \text{ m} \times 6.2 \text{ m} = 60.016 \text{ m}^2$

Length of the tile = 22 cm

Breadth of the tile = 10 cm

Area of one tile = $22 \text{ cm} \times 10 \text{ cm} = 220 \text{ cm}^2 = 0.022 \text{ m}^2$ [Since $1 \text{ m}^2 = 10000 \text{ cm}^2$]

Thus,

Number of tiles = $\frac{60.016 \text{ m}^2}{0.022 \text{ m}^2} = 2728$

Cost of one tile = Rs. 2.50

Total cost = Number of tiles x Cost of one tile

= Rs. (2728×2.50) = Rs. 6820

Mensuration I Ex 20.1 Q12

Answer :

We have,

Side of the square field = 179 m

Area of the field = $(\text{Side})^2 = (179 \text{ m})^2 = 32041 \text{ m}^2$

Rate of raising a lawn on the field per square metre = Rs. 1.50

Thus,

Total cost of raising a lawn on the field = Rs. (32041×1.50) = Rs. 48061.50

***** END *****
