

Exercise 16B

Q1

Answer :

(c) rhombus

In a rhombus, the two diagonals are not necessarily equal.

Q2

(c) 10 cm

Let $ABCD$ be a rhombus.

Let AC and BD be the diagonals of the rhombus intersecting at a point O .

$$AC = 16 \text{ cm}$$

$$BD = 12 \text{ cm}$$

We know that the diagonals of a rhombus bisect each other at right angles.

$$\therefore AO = \frac{1}{2} AC$$

$$= \left(\frac{1}{2} \times 16 \right) \text{ cm}$$

$$= 8 \text{ cm}$$

$$BO = \frac{1}{2} BD$$

$$= \left(\frac{1}{2} \times 12 \right) \text{ cm}$$

$$= 6 \text{ cm}$$

From the right $\triangle AOB$:

$$AB^2 = AO^2 + BO^2$$

$$= \left\{ (8)^2 + (6)^2 \right\} \text{ cm}^2$$

$$= (64 + 36) \text{ cm}^2$$

$$= 100 \text{ cm}^2$$

$$\Rightarrow AB = \sqrt{100} \text{ cm}$$

$$= 10 \text{ cm}$$

Hence, the length of the side AB is 10 cm.

Therefore, the length of each side of the rhombus is 10 cm because all the sides of a rhombus are equal.

Q3

Answer:

$$(b) 32$$

We know that the sum of adjacent angles of a parallelogram is 180° .

$$\Rightarrow 2x + 25 + 3x - 5 = 180$$

$$\Rightarrow 5x + 20 = 180$$

$$\Rightarrow 5x = 180 - 20$$

$$\Rightarrow 5x = 160$$

$$\Rightarrow x = \frac{160}{5}$$

$$\Rightarrow x = 32$$

Therefore, the value of x is 32.

Q4

Answer:

(a) parallelogram

In a parallelogram, the diagonals do not necessarily intersect at right angles.

Q5

Answer:

(c) 70 cm

Let $ABCD$ be a rectangle and let the diagonal AC be 25 cm, length AB be $4x$ cm and breadth BC be $3x$ cm.

Each angle of a rectangle is a right angle.

$$\therefore \angle ABC = 90^\circ$$

From the right $\triangle ABC$:

$$AC^2 = AB^2 + BC^2$$

$$\Rightarrow (25)^2 = (4x)^2 + (3x)^2$$

$$\Rightarrow 625 = 16x^2 + 9x^2$$

$$\Rightarrow 625 = 25x^2$$

$$x^2 = \frac{625}{25} = 25$$

$$\Rightarrow x = 5$$

$$\therefore \text{Length} = 4 \times 5 = 20 \text{ cm}$$

$$\text{Breadth} = 3 \times 5 = 15 \text{ cm}$$

$$\therefore \text{Perimeter of the rectangle} = 2(20+15) \text{ cm}$$

$$= 70 \text{ cm}$$

Q6

Answer:

(d) 90°

The bisectors of any two adjacent angles of a parallelogram intersect at 90° .

***** END *****
