Question 2.

1. How long do you think you can stay alive in the water?

2. How will you know which way to swim?

3. What dangers will you face?

Answer:

1. A person can stay alive if he/she does not catch hypothermia. One must try to stay awake and not let fatigue overpower them. One can stay alive for a day or two at least if enormous waves do not swirl him/her into the depths of the sea.
2. One must keep in mind the position of the sun during day and pole star during night to know east and west and north respectively. Thus, one has to remember the direction in which they had to sail to reach the destination and swim accordingly.
3. One can face several dangers in the blue. There can be huge water waves that might force drown the person. If the water will be too cold then the person can catch hypothermia. There is danger of sharks and other marine creatures. Thus, there are several risks involved and it is really difficult to escape such a situation. However, there have been cases in which people have been lucky enough.
