

NCERT Solutions For Class 7 Maths Perimeter and Area Exercise 11.3

Q1. Find the circumference of the circles with the following radius: (Take $\pi = \frac{22}{7}$)

(a) 14 cm (b) 28 mm (c) 21 cm

Ans:

(a) $r = 14$ cm

$$\text{Circumference} = 2\pi r = 2 \times \frac{22}{7} \times 14 = 88 \text{ cm}$$

(b) $r = 28$ mm

$$\text{Circumference} = 2\pi r = 2 \times \frac{22}{7} \times 28 = 176 \text{ mm}$$

(c) $r = 21$ cm

$$\text{Circumference} = 2\pi r = 2 \times \frac{22}{7} \times 21 = 132 \text{ cm}$$

Q2.

Find the area of the following circles, given that:

(a) radius = 14 mm (Take $\pi = \frac{22}{7}$) (b) diameter = 49 m

(c) radius = 5 cm

Ans:

(a) $r = 14$ mm

$$\text{Area} = \pi r^2 = \frac{22}{7} \times 14 \times 14 = 616 \text{ mm}^2$$

(b) $d = 49$ m

$$r = \frac{49}{2} \text{ m}$$

$$\text{Area} = \pi r^2 = \frac{22}{7} \times \frac{49}{2} \times \frac{49}{2} = 1886.5 \text{ m}^2$$

(c) $r = 5$ cm

$$\text{Area} = \pi r^2 = \frac{22}{7} \times 5 \times 5 = \frac{550}{7} = 78.57 \text{ cm}^2$$

Q3. If the circumference of a circular sheet is 154m, find its radius. Also find the area of the sheet. (Take $\pi = \frac{22}{7}$)

Ans:

$$\text{Circumference} = 2\pi r = 154 \text{ m}$$

$$2 \times \frac{22}{7} \times r = 154$$

$$r = 154 \times \frac{7}{44} = \frac{49}{2} = 24.5 \text{ m}$$

$$\text{Area} = \pi r^2 = \frac{22}{7} \times r^2$$

$$= \frac{22}{7} \times \frac{49}{2} \times \frac{49}{2} = 1886.5 \text{ m}^2$$

Q4. A gardener wants to fence a circular garden of diameter 21 m. Find the length of the rope he needs to purchase, if he makes 2 rounds of fence. Also find the costs of the rope, if it cost Rs 4 per meter. (Take $\pi = \frac{22}{7}$)

Ans:

$$d = 21 \text{ m}$$

$$r = \frac{21}{2} \text{ m}$$

$$\text{Circumference} = 2\pi r = 2 \times \frac{22}{7} \times \frac{21}{2} = 66 \text{ m}$$

$$\text{Length of rope required for fencing} = 2 \times 66 \text{ m} = 132 \text{ m}$$

$$\text{Cost of 1 m rope} = \text{Rs } 4$$

$$\text{Cost of 132 m rope} = 4 \times 132 = \text{Rs } 528$$

Q5. From a circular sheet of radius 4 cm, a circle of radius 3 cm is removed. Find the area of the remaining sheet. (Take $\pi = 3.14$)

Ans:

Outer radius of circular sheet = 4 cm

Inner radius of circular sheet = 3 cm

Remaining area = $3.14 \times 4 \times 4 - 3.14 \times 3 \times 3$

$$= 50.24 - 28.26$$

$$= 21.98 \text{ cm}^2$$

Q6. Saima wants to put a lace on the edge of a circular table cover of diameter 1.5 m. Find the length of the lace required and also find its cost if one meter of the lace costs Rs 15. (Take $\pi = 3.14$)

Ans:

Circumference = $2\pi r$

$$= 2 \times 3.14 \times \frac{d}{2}$$

$$= 2 \times 3.14 \times \frac{1.5}{2} = 4.71 \text{ m}$$

Cost of 1 m lace = Rs 15

Cost of 4.71 m lace = $4.71 \times 15 = \text{Rs } 70.65$

Q7. Find the perimeter of the adjoining figure, which is a semicircle including its diameter.

Ans:

Radius = 5 cm

Length of curved part = πr

$$= \frac{22}{7} \times 5$$

$$= 15.71 \text{ cm}$$

Total perimeter = Length of curved part +
Length of diameter

$$= 15.71 + 10 = 25.71 \text{ cm}$$

Q8. Find the cost of polishing a circular table-top of diameter 1.6 m, if the rate of polishing is

Rs 15/m². (Take $\pi = 3.14$)

Ans:

Diameter = 1.6 m

$$\text{Radius} = \frac{1.6}{2} = 0.8 \text{ m}$$

$$\text{Area} = 3.14 \times 0.8 \times 0.8$$

$$= 2.0096 \text{ m}^2$$

Cost for polishing 1 m² area = Rs 15

$$\begin{aligned}\text{Cost for polishing } 2.0096 \text{ m}^2 \text{ area} &= 15 \times 2.0096 \\ &= 30.14\end{aligned}$$

Therefore, it will cost Rs 30.14 for polishing such circular table.

Q9. Shazli took a wire of length 44 cm and bent it into the shape of a circle. Find the radius of that circle. Also find its area. If the same wire is bent into the shape of a square, what will be the length of each of its sides? Which figure encloses more area, the circle or the square? (Take $\pi = \frac{22}{7}$)

Ans:

$$\text{Circumference} = 2\pi r = 44 \text{ cm}$$

$$2 \times \frac{22}{7} \times r = 44$$

$$r = 7 \text{ cm}$$

$$\text{Area} = \pi r^2 = \frac{22}{7} \times 7 \times 7 = 154 \text{ cm}^2$$

If the wire is bent into a square, then the length of each side would be $= \frac{44}{4} = 11 \text{ cm}$

$$\text{Area of square} = (11)^2 = 121 \text{ cm}^2$$

Therefore, circle encloses more area.

Q10. From a circular card sheet of radius 14 cm, two circles of radius 3.5 cm and a rectangle of length 3 cm and breadth 1 cm are removed (as shown in the following figure). Find the area of the remaining sheet. (Take $\pi = \frac{22}{7}$)

Ans:

$$\text{Area of bigger circle} = \frac{22}{7} \times 14 \times 14 = 616 \text{ cm}^2$$

$$\text{Area of 2 small circles} = 2 \times \pi r^2$$

$$= 2 \times \frac{22}{7} \times 3.5 \times 3.5 = 77 \text{ cm}^2$$

$$\text{Area of rectangle} = \text{Length} \times \text{Breadth} = 3 \times 1 = 3 \text{ cm}^2$$

$$\text{Remaining area of sheet} = 616 - 77 - 3 = 536 \text{ cm}^2$$

Q11. A circle of radius 2 cm is cut out from a square piece of an aluminium sheet of side 6 cm. What is the area of the left over aluminium sheet? (Take $\pi = 3.14$)

Ans:

$$\text{Area of square-shaped sheet} = (\text{Side})^2 = (6)^2 = 36 \text{ cm}^2$$

$$\text{Area of circle} = 3.14 \times 2 \times 2 = 12.56 \text{ cm}^2$$

$$\text{Remaining area of sheet} = 36 - 12.56 = 23.44 \text{ cm}^2$$

Q12. The circumference of a circle is 31.4 cm. Find the radius and the area of the circle? (Take $\pi = 3.14$)

Ans:

$$\text{Circumference} = 2\pi r = 31.4 \text{ cm}$$

$$2 \times 3.14 \times r = 31.4$$

$$r = 5 \text{ cm}$$

$$\text{Area} = 3.14 \times 5 \times 5 = 78.50 \text{ cm}^2$$

Q13. A circular flower bed is surrounded by a path 4 m wide. The diameter of the flower bed is 66 m. What is the area of this path? ($\pi = 3.14$)

Ans:

$$\text{Radius of flower bed} = \frac{66}{2} = 33 \text{ m}$$

$$\text{Radius of flower bed and path together} = 33 + 4 = 37 \text{ m}$$

$$\text{Area of flower bed and path together} = 3.14 \times 37 \times 37 = 4298.66 \text{ m}^2$$

$$\text{Area of flower bed} = 3.14 \times 33 \times 33 = 3419.46 \text{ m}^2$$

$$\begin{aligned} \text{Area of path} &= \text{Area of flower bed and path together} - \text{Area of flower bed} \\ &= 4298.66 - 3419.46 = 879.20 \text{ m}^2 \end{aligned}$$

Q14. A circular flower garden has an area of 314 m². A sprinkler at the centre of the garden can cover an area that has a radius of 12 m. Will the sprinkler water the entire garden? (Take $\pi = 3.14$)

Ans:

$$\text{Area} = \pi r^2 = 314 \text{ m}^2$$

$$3.14 \times r^2 = 314$$

$$r^2 = 100$$

$$r = 10 \text{ m}$$

Yes, the sprinkler will water the whole garden.

Q15. Find the circumference of the inner and the outer circles, shown in the adjoining figure? (Take $\pi = 3.14$)

Ans:

Radius of outer circle = 19 m

Circumference = $2\pi r = 2 \times 3.14 \times 19 = 119.32$ m

Radius of inner circle = $19 - 10 = 9$ m

Circumference = $2\pi r = 2 \times 3.14 \times 9 = 56.52$ m

Q16. How many times a wheel of radius 28 cm must rotate to go 352 m?

(Take $\pi = \frac{22}{7}$)

Ans:

$r = 28$ cm

Circumference = $2\pi r = 2 \times \frac{22}{7} \times 28 = 176$ cm

Number of rotations =

$\frac{\text{Total distance to be covered}}{\text{Circumference of wheel}} = \frac{352\text{m}}{176\text{cm}} = \frac{35200}{176} = 200$

Therefore, it will rotate 200 times.

Q17. The minute hand of a circular clock is 15 cm long. How far does the tip of the minute hand move in 1 hour. (Take $\pi = 3.14$)

Ans:

Distance travelled by the tip of minute hand =
Circumference of the clock

$= 2\pi r = 2 \times 3.14 \times 15$

$= 94.2$ cm

***** END *****
