

Question 1. Which one of the following materials cannot be used to make a lens?

- (a) Water (b) Glass
- (c) Plastic (d) Clay

Answer: (d) Clay

Question 2. The image formed by a concave mirror is observed to be virtual, erect and larger than the object. Where should be the position of the object?

- (a) Between the principal focus and the centre of Curvature
- (b) At the centre of curvature
- (c) Beyond the centre of curvature
- (d) Between the pole of the mirror and its principal focus.

Answer: (d) Between the pole of the mirror and its principal focus.

Question 3. Where should an object be placed in front of a convex lens to get a real image of the size of the object?

- (a) At the principal focus of the lens
- (b) At twice the focal length
- (c) At infinity
- (d) Between the optical centre of the lens and its principal focus

Answer: (b) At twice the focal length

Question 4. A spherical mirror and a thin spherical lens have each a focal length of 15 cm. The mirror and the lens are likely to be:

- (a) both concave
- (b) both convex
- (c) the mirror is concave, but the lens is convex
- (d) the mirror is convex, but the lens is concave

Answer: (a) Both concave.

Question 5. No matter how far you stand from a mirror, your image appears erect. The mirror is likely to be

- (a) plane
- (b) concave
- (c) convex
- (d) Either plane or convex

Answer: (d) Either plane or convex.

Question 6. Which of the following lenses would you prefer to use while reading small letters found in a dictionary?

- (a) A convex lens of focal length 50cm
- (b) A concave lens of focal length 50cm
- (c) A convex lens of focal length 5 cm
- (d) A concave lens of focal length 5 cm.

Answer: (c) A convex lens of focal length 5 cm.
