

Mensuration I Ex 20.2 Q1

**Answer :**

We have,

Length  $AB = 40$  m and breadth  $BC = 25$  m

$$\therefore \text{Area of lawn } ABCD = 40 \text{ m} \times 25 \text{ m} = 1000 \text{ m}^2$$

$$\text{Length } PQ = (40 + 2 + 2) \text{ m} = 44 \text{ m}$$

$$\text{Breadth } QR = (25 + 2 + 2) \text{ m} = 29 \text{ m}$$

$$\therefore \text{Area of } PQRS = 44 \text{ m} \times 29 \text{ m} = 1276 \text{ m}^2$$

Now,

$$\begin{aligned} \text{Area of the path} &= \text{Area of } PQRS - \text{Area of the lawn } ABCD \\ &= 1276 \text{ m}^2 - 1000 \text{ m}^2 \\ &= 276 \text{ m}^2 \end{aligned}$$

$$\text{Rate of levelling the path} = \text{Rs. } 8.25 \text{ per m}^2$$

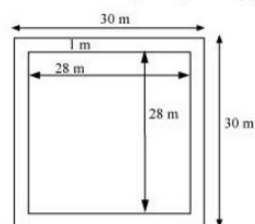

$$\begin{aligned} \therefore \text{Cost of levelling the path} &= \text{Rs. } (8.25 \times 276) \\ &= \text{Rs. } 2277 \end{aligned}$$

Mensuration I Ex 20.2 Q2

**Answer :**

We have,

The side of the square garden ( $a$ ) = 30 m

$$\therefore \text{Area of the square garden including the path} = a^2 = (30)^2 = 900 \text{ m}^2$$

From the figure, it can be observed that the side of the square garden, when the path is not included, is 28 m.

$$\text{Area of the square garden not including the path} = (28)^2 = 784 \text{ m}^2$$

Total cost of covering the park with grass = Area of the park covering with green grass x Rate per square metre

$$1176 = 784 \times \text{Rate per square metre}$$

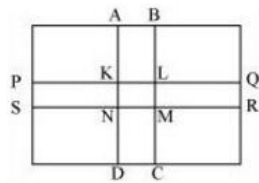

$$\begin{aligned} \therefore \text{Rate per square metre at which the park is covered with grass} &= \text{Rs. } (1176 \div 784) \\ &= \text{Rs. } 1.50 \end{aligned}$$

Mensuration I Ex 20.2 Q3

**Answer :**

We have,

Length of the rectangular field = 90 m and breadth of the rectangular field = 60 m

$\therefore$  Area of the rectangular field = 90 m x 60 m = 5400 m<sup>2</sup>

Area of the road PQRS = 90 m x 3 m = 270 m<sup>2</sup>

Area of the road ABCD = 60 m x 3 m = 180 m<sup>2</sup>

Clearly, area of KLMN is common to the two roads.

Thus, area of KLMN = 3 m x 3 m = 9 m<sup>2</sup>

Hence,

$$\begin{aligned}\text{Area of the roads} &= \text{Area (PQRS)} + \text{Area (ABCD)} - \text{Area (KLMN)} \\ &= (270 + 180) \text{ m}^2 - 9 \text{ m}^2 = 441 \text{ m}^2\end{aligned}$$
