

Surface Area and volume of A Right Circular cylinder Ex 19.2 Q11

Answer :

Data given is as follows:

$$\frac{\text{Curved Surface Area}}{\text{Total Surface Area}} = \left(\frac{1}{2}\right)$$

$$\text{Total Surface Area} = 616 \text{ cm}^2$$

We have to find the volume of the cylinder.

From the given data we have,

$$\frac{\text{Curved Surface Area}}{\text{Total Surface Area}} = \left(\frac{1}{2}\right)$$

$$\begin{aligned}\text{Curved Surface Area} &= \left(\frac{1}{2}\right) \times \text{Total Surface Area} \\ &= \left(\frac{1}{2}\right) \times 616 \text{ cm}^2 \\ &= 308 \text{ cm}^2\end{aligned}$$

Also,

$$\frac{\text{Curved Surface Area}}{\text{Total Surface Area}} = \left(\frac{1}{2}\right)$$

$$\frac{2\pi rh}{2\pi rh + 2\pi r^2} = \frac{1}{2}$$

$$\frac{h}{h+r} = \frac{1}{2}$$

$$2h = h+r$$

$$h = r$$

$$2 \times \frac{22}{7} \times r^2 = 308$$

We have found out the Curved Surface Area of the cylinder which is 308 cm^2 .

$$\text{Curved Surface Area} = 308 \text{ cm}^2$$

$$2\pi rh = 308$$

Now, let us replace h with r in the above equation since in the previous step we have found that

$$h = r$$

$$2\pi r^2 = 308$$

$$2 \times \frac{22}{7} \times r^2 = 308$$

$$r = 7$$

Since $h = r$, h is also equal to 7

$$\text{Volume} = \pi r^2 h$$

$$= \frac{22}{7} \times 7 \times 7 \times 7$$

$$\boxed{\text{Volume} = 1078 \text{ cm}^3}$$

Surface Area and volume of A Right Circular cylinder Ex 19.2 Q12

Answer :

Given data is as follows:

$$\text{Curved Surface Area} = 1320 \text{ cm}^2$$

$$\text{Diameter} = 21 \text{ cm}$$

We have to find the height and volume of the cylinder.

First of all, we have been given the diameter so let us find out the radius.

$$r = \frac{21}{2} \text{ cm}$$

We know that,

$$\text{Curved Surface Area} = 2\pi rh$$

Therefore,

$$2\pi rh = 1320$$

$$2 \times \frac{22}{7} \times \frac{21}{2} \times h = 1320$$

$$\boxed{h = 20 \text{ cm}}$$

Now that we know both r and h , we can easily find out the volume.

$$\text{Volume} = \pi r^2 h$$

$$= \frac{22}{7} \times \frac{21}{2} \times \frac{21}{2} \times 20$$

$$\boxed{\text{Volume} = 6930 \text{ cm}^3}$$

***** END *****
