

## Exercise 6A

Question 3:

(i) In (7, 0), we have the ordinate = 0. Therefore, (7,0) lies on the x-axis

(ii) In (0, -5), we have the abscissa = 0. Therefore, (0,-5) lies on the y-axis

(iii) In (0,1), we have the abscissa = 0. Therefore, (0,1) lies on the y-axis

(iv) In (-4,0), we have the ordinate = 0. Therefore, (-4,0) lies on the x-axis

## Question 4:

- (i) Points of the type (-, +) lie in the second quadrant. Therefore, the point (-6,5) lies in the II quadrant.
- (ii) Points of the type (-, -) lie in the third quadrant. Therefore, the point (-3, -2) lies in the III quadrant.
- (iii) Points of the type (+, -) lie in the fourth quadrant. Therefore, the point (2,-9) lies in the IV quadrant.
