

Exercise 17B

Question 24:

Rs. 14 is the cost of fencing a length = 1m

Rs. 28000 is the cost of fencing the length = $\frac{28000}{14}$ m = 2000 m

Perimeter = 4 side = 2000

 \Rightarrow side = 500 m

Area of a square = $(side)^2 = (500)^2 m$

= 250000 m²

Cost of mowing the lawn = Rs $\left(250000 \times \frac{54}{100}\right)$ = Rs. 135000

Question 25:

Largest possible size of square tile = HCF of 525 cm and 378 cm = 21 cm

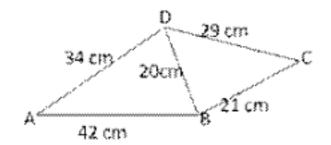

Number of tiles = Area of rectangle
Area of square tiles

$$= \frac{(525 \times 378)}{(21 \times 21)} \text{cm}^2$$

Question 26:

Area of quad. ABCD = Area of Δ ABD + Area of Δ DBC For area of Δ ABD

Let a = 42 cm, b = 34 cm, and c = 20 cm

$$s = \frac{a+b+c}{2} = \frac{(42+34+20)}{2} \text{ cm} = 48$$
Then, $(s-a) = 6$, $(s-b) = 14$ and $(s-c) = 28$
Area of $\triangle ABC = \sqrt{s \times (s-a)(s-b)(s-c)}$

$$= \sqrt{48 \times 6 \times 14 \times 28} \text{ cm}^2$$

$$= (6 \times 7 \times 8) \text{ cm}^2 = 336 \text{ cm}^2$$

For area of Δ DBC

a = 29 cm, b = 21 cm, c = 20 cm

$$s = \frac{a+b+c}{2} = \frac{(29+21+20)}{2}$$
 cm = 35 cm

$$(s-a) = 6 \text{ cm}, (s-b) = 14 \text{ cm} \text{ and } (s-c) = 15 \text{ cm}$$

Area of
$$\triangle DBC = \sqrt{s \times (s - a)(s - b)(s - c)}$$
 sq.units
= $\sqrt{35 \times 6 \times 14 \times 15}$ cm²

$$= (5 \times 7 \times 2 \times 3) \text{ cm}^2 = 210 \text{ cm}^2$$

Area of quad.ABCD = Area of
$$\triangle$$
ABC + Area of \triangle DBC
= $(336 + 210) \text{ cm}^2 = 546 \text{ cm}^2$

******* END *******
