

Percentage Ex 12.2 Q1

Answer:

(i) 22% of
$$120 = \frac{22}{100} \times 120$$

= 26.4
(ii) 25% of $1000 = \frac{25}{100} \times 1000$
= 250
(iii) 25% of $10 \text{ kg} = \frac{25}{100} \times 10 \text{ kg}$
= $\frac{25}{10} \text{ kg} = \frac{5}{2} \text{ kg}$
= 2.5 kg
(iv) 16.5% of 5000 m = $\frac{16.5}{100} \times 5000 \text{ m}$
= 16.5 × 50 m
= 825 m
(v) 135% of 80 cm = $\frac{135}{100} \times 80 \text{ cm}$
= $\frac{135 \times 8}{10} \text{ cm}$
= 108 cm = 1.08 m
(vi) 2.5% of 10000 ml = $\frac{2.5}{100} \times 10000 \text{ ml}$
= 250 ml

Percentage Ex 12.2 Q2

Answer:

(i)
$$8.4 \% of a \text{ is } 42.$$

i.e.,
$$\frac{8.4}{100} \times a = 42$$

$$\Rightarrow a = \frac{42 \times 100}{3}$$

$$a = 500$$

(ii)
$$0.5\%$$
 of a is 3.

i.e.,
$$\frac{0.5}{100} \times a = 3$$

$$\Rightarrow a = \frac{3 \times 100}{0.5}$$

$$a = 600$$

(iii)
$$\frac{1}{2}$$
% of a is 50.

i.e.,
$$\frac{1}{2} \times \frac{1}{100} \times a = 50$$

$$\Rightarrow a = 50 \times 200$$

$$a = 10000$$

(iv)
$$100\% \ of \ a$$
 is 100 .

i.e.,
$$\frac{100}{100} \times a = 100$$

$$\Rightarrow 1 \times a = 100$$

$$a = 100$$

Percentage Ex 12.2 Q3

Answer:

Given:

$$x = \frac{5}{100} y$$

$$\Rightarrow y = \frac{100}{5} x$$

$$\therefore y = 20x$$

Also,
$$y = \frac{24}{100} z$$

$$\therefore z = \frac{100}{24} y$$

Putting x = 480 in the above equations, we get:

$$y = 20(480) = 9600$$

$$z = \frac{100}{24} \times 9600 = 40000$$

********* END ********
