

Exercise 8A

Question 6: The given equation is 2x + y = 6 $\Rightarrow y = 6 - 2x$ Now, if x = 1, then y = 6 - 2 (1) = 4 And, if x = 2, then y = 6 - 2 (2) = 2 Thus, we have the following table:

X	1	2
У	4	2

Plot points (1,4) and (2,2) on a graph paper and join them to get the required graph.

We find that the line cuts the x-axis at a point P which is at a distance of 3 units to the right of y-axis. So, the co-ordinates of P are (3,0).
