Linear Equations in One Variable Ex 9.1 Q1

Answer:

$9\frac{1}{4} = y - 1\frac{1}{3}$

or $\frac{37}{4} + \frac{4}{3} = y$ or $y = \frac{127}{12}$ ∴ $y = \frac{127}{12}$ for the given equation. Check : L.H.S $= 9\frac{1}{4}$ R.H

.S $= \frac{127}{12} - 1\frac{1}{3} = \frac{127}{12} - \frac{4}{3} = \frac{127-16}{12} = \frac{111}{12} = 9\frac{1}{4}$ So, L.H.S $=$ R.H.S for $y = \frac{127}{12}$

Linear Equations in One Variable Ex 9.1 Q2

Answer :

$$\frac{5x}{3} + \frac{2}{5} = 1$$

$$\Rightarrow \quad \frac{5x}{3} = 1 - \frac{2}{5}$$

$$\Rightarrow \quad \frac{5x}{3} = \frac{3}{5}$$

$$\Rightarrow \quad x = \frac{3}{5} \times \frac{3}{5} = \frac{9}{25}$$

Verification :

$$\text{L.H.S.} = \frac{5}{3} \times \frac{9}{25} + \frac{2}{5} = \frac{3}{5} + \frac{2}{5} = 1$$

$$\text{R.H.S.} = 1$$

$$\therefore \text{ L.H.S.} = \text{R.H.S. for } x = \frac{9}{25}$$

Linear Equations in One Variable Ex 9.1 Q3

Answer :

$\frac{x}{2} + \frac{x}{3} + \frac{x}{4} = 13$

$\Rightarrow \quad \frac{x \times 6 + x \times 4 + x \times 3}{12} = 13$

$\Rightarrow \quad \frac{13x}{12} = 13$

$\Rightarrow \quad x = 13 \times \frac{12}{13} = 12$

Verification :

L.H.S. $= \frac{12}{2} + \frac{12}{3} + \frac{12}{4} = 6 + 4 + 3 = 13 = $ R.H.S.

Linear Equations in One Variable Ex 9.1 Q4

Answer:

$\frac{x}{2} + \frac{x}{8} = \frac{1}{8}$

or $\frac{4x+x}{8} = \frac{1}{8}$

or $\frac{5x}{8} = \frac{1}{8}$

or $x = \frac{1}{8} \times \frac{8}{5} = \frac{1}{5}$

Verification :

L. H. S. $= \frac{1}{2} \times \frac{1}{5} + \frac{1}{8} \times \frac{1}{5} = \frac{1}{10} + \frac{1}{40} = \frac{5}{40} = \frac{1}{8} =$ R. H. S.

Linear Equations in One Variable Ex 9.1 Q5

Answer:

$$\frac{2x}{3} - \frac{3x}{8} = \frac{7}{12}$$

or $$\frac{16x - 9x}{24} = \frac{7}{12}$$

or $$\frac{7x}{24} = \frac{7}{12}$$

or $$x = \frac{7}{12} \times \frac{24}{7} = 2$$

Verification :

$$\text{L. H. S.} = \frac{4}{3} - \frac{6}{8} = \frac{32 - 18}{24} = \frac{7}{12}$$

$$\text{R. H. S.} = \frac{7}{12}$$

$$\therefore \text{R. H. S.} = \text{L. H. S. for } x = 2$$
