Operations on Whole Numbers Ex 4.2 Q7

Answer :

Total population of the town = 96209
Number of men = 29642
Number of women = 29167
Sum of men and women = (29642 + 29167) = 58809
∴ Number of children in the town = (Total population) − (Sum of men and women)
= 96209 − 58809 = 37400

Operations on Whole Numbers Ex 4.2 Q8

Answer :

Original number = 39460

New number =   − 36490

Difference =   2970

Operations on Whole Numbers Ex 4.2 Q9

Answer :

Population of the town = 59000
Increase in the population = 4536
Decrease in the population = 9218
New population = 59000 + 4536 − 9218 = 54318
